## Safety Data Sheet

Date of the latest revision of the safety data sheet: 08-06-2021 Supercedes: 08-06-2021

#### **KLONDIKE AW 22 Advanced Formula Hydraulic Fluid**

1 Identification			
Product Identifier: Stock Number:	KLONDIKE AW 22 Advanced For	mula Hydraulic Fluid	
Other means of identification: Synonyms:	No data available		
Recommended use and restrictions on use Recommended use: Restrictions on use: Initial Supplier Identifier: Tel No.: Email:	Hydraulic Oil Uses other than those described KLONDIKE Lubricants Corporation 3078 275th Street Langley, BC, V4W 3L4 Canada General information 1-877-29 info@klondikelubricants.com	on	
Emergency telephone number and any restrictions on the use of that number, if applicable:	Chemtrec (Within US) 1-80 (International) 1-703-527-388	0-424-9300 Chemtrec 37	
2 Hazard identification			
Classification of the hazardous product: Not classified under GHS			
Hazard statements:	Not applicable		
Other hazards known to the supplier with Physical hazards not otherwise classified	respect to the hazardous produc None known.	:t:	
Health hazards not otherwise classified	None known.		
3 Composition/information on ingredients			
Chemical Name	Common name and synonyms	CAS registry number and any	Concentration

		unique identifiers	concentration
Petroleum distillates, hydrotreated heavy paraffinic	No data available	64742-54-7	80 - 100

#### 4 First-aid measures

Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen.
Eye contact:	No data available
Skin Contact:	Wash with soap and water. Get medical attention if irritation develops or persists.
Ingestion:	No hazard in normal industrial use. Do not induce vomiting. Seek medical attention if symptoms develop. Provide medical care provider with this SDS.
The most important symptoms and effects, whether acute or delayed:	None known.
An indication of immediate medical attention and special treatment needed, if necessary:	No additional first aid information available.

5 Fire-fighting measures	
Suitable extinguishing media:	Use alcohol resistant foam, carbon dioxide, or dry chemical when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the surface of the fire. Do not direct a stream of water into the hot burning liquid.
Unsuitable extinguishing media:	No data available
Specific hazards arising from the hazardous product, such as the nature of any hazardous combustion:	Material may be ignited only if preheated to temperatures above the high flash point, for example in a fire.
Hazardous Combustion Products:	Carbon dioxide, Carbon monoxide
Special protective equipment and precautions for firefighters:	Do not enter fire area without proper protection including self- contained breathing apparatus and full protective equipment. Use methods for the surrounding fire.
6 Accidental release measures	
Personal precautions, protective equipment and emergency procedures:	No health affects expected from the clean up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section 8 of this SDS.
Methods and materials for containment and cleaning up:	Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section 8 at a minimum. Dike with suitable absorbent material like granulated clay. Dispose of according to Federal, State, Local, or Provincial regulations. Used fluid should be disposed of at a recycling center.
7 Handling and storage	

Conditions for safe storage: Materials to Avoid/Chemical Incompatibility: Store in a cool dry place. Isolate from incompatible materials. Strong oxidizing agents

#### 8 Exposure controls/personal protection

Control parameters, including occupational exposure limit values or biological limit values and the source of those values:

#### Canada – Alberta – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	10 mg/m3 STEL	No data available

#### Canada – British Columbia– Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	0.2 mg/m3 TWA (mildly refined); 1 mg/m3 TWA (severely refined)	No data available	No data available

#### Canada – Manitoba – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	No data available	No data available

#### Canada – New Brunswick – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	10 mg/m3 STEL	No data available

#### Canada – Newfoundland & Labrador – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	No data available	No data available

#### Canada – Northwest Territories – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	10 mg/m3 STEL	No data available

#### Canada – Nova Scotia – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	No data available	No data available

#### Canada – Nunavut – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	10 mg/m3 STEL	No data available

#### Canada – Ontario – Occupational Exposure Limits:

Chemical Name	Occupational Exposure Limits - TWAs	Occupational Exposure Limits - STELs	Occupational Exposure Limits - Ceiling
Petroleum distillates,	5 mg/m3 TWA	No data available	No data available
hydrotreated heavy paraffinic			

#### Canada – Prince Edward Island – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	No data available	No data available

#### Canada – Quebec – Occupational Exposure Limits:

Chemical Name	Occupational Exposure Limits - TWAEVs	Occupational Exposure Limits - STEVs	Occupational Exposure Limits - Ceiling
Petroleum distillates,	No data available	No data available	No data available
hydrotreated heavy paraffinic			

#### Canada – Saskatchewan – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -

	TWAs	STELs	Ceiling
Petroleum distillates,	5 mg/m3 TWA	10 mg/m3 STEL	No data available
hydrotreated heavy paraffinic		_	

#### Canada - Yukon – Occupational Exposure Limits:

Chemical Name	Occupational	Occupational	Occupational
	Exposure Limits -	Exposure Limits -	Exposure Limits -
	TWAs	STELs	Ceiling
Petroleum distillates, hydrotreated heavy paraffinic	5 mg/m3 TWA	10 mg/m3 STEL	No data available

Chemical Name	OSHA PEL	ACGIH TLV-TWA	ACGIH STEL	IDLH
Petroleum distillates, hydrotreated	5 mg/m3 TWA	5 mg/m3 TWA	10 mg/m3 STEL	No data available
heavy paraffinic	-	-	-	

#### Appropriate engineering controls:

Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort.

#### Individual protection measures, such as personal protective equipment:

Respiratory Protection:	Respiratory protection may be required to avoid overexposure when
	handling this product. General or local exhaust ventilation is the
	preferred means of protection. Use a respirator if general room
	ventilation is not available or sufficient to eliminate symptoms.
Respirator Type(s):	None required where adequate ventilation is provided. If airborne
	concentrations are above the applicable exposure limits, use
	NIOSH/MSHA approved respiratory protection.
Eye and face protection:	Wear safety glasses when handling this product if there is a likelihood of contact with eyes.
Skin Protection:	Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work.
Hand protection:	Neoprene, Nitrile
General hygiene conditions:	No data available
ocherar nygiche conditions.	

9 Physical and chemical propertie	6
Physical state:	Liquid
Colour:	Amber
Odour:	Mild
	Petroleum
Odour threshold:	Not determined
pH:	No data available
Melting point (°C):	No data available
Freezing point (°C):	No data available

Initial boiling point and boiling range (°C):	No data available
Flash point (°C):	210
Evaporation rate:	No data available
Flammability, in the case of solids and	No data available
gases:	
Upper flammable or explosive limit, %	Not established
in air:	
Lower flammable or explosive limit, %	Not established
in air:	
Vapour pressure:	No data available
Vapour density:	No data available
Relative density:	0.86
Solubility:	Negligible; 0-1%
Partition coefficient — n-octanol/water:	No data available
Auto-ignition temperature (°C):	No data available
Decomposition temperature (°C):	Not determined
Viscosity:	32.11
10 Stability and reactivity	
Reactivity:	There are no known reactivity hazards associated with this product.
	3
Chemical stability:	Stable under normal conditions.
Chemical stability: Possibility of hazardous reactions:	Stable under normal conditions. None expected under standard conditions of storage.
Chemical stability:	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in
Chemical stability: Possibility of hazardous reactions:	Stable under normal conditions. None expected under standard conditions of storage.
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition.
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static discharge, shock or vibration:	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Moisture (will lead to product performance degradation).
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static discharge, shock or vibration: Incompatible materials:	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Moisture (will lead to product performance degradation). Strong oxidizing agents
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static discharge, shock or vibration: Incompatible materials:	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Moisture (will lead to product performance degradation). Strong oxidizing agents
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static discharge, shock or vibration: Incompatible materials: Hazardous decomposition products:	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Moisture (will lead to product performance degradation). Strong oxidizing agents
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static discharge, shock or vibration: Incompatible materials: Hazardous decomposition products: 11 Toxicological information	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Moisture (will lead to product performance degradation). Strong oxidizing agents No data available
Chemical stability: Possibility of hazardous reactions: Conditions to avoid, including static discharge, shock or vibration: Incompatible materials: Hazardous decomposition products: <u>11 Toxicological information</u> Information on the likely routes of	Stable under normal conditions. None expected under standard conditions of storage. Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Moisture (will lead to product performance degradation). Strong oxidizing agents No data available

Moisture (will lead to product performance degradation). Strong oxidizing agents No data available Eye contact, Ingestion, Inhalation, Skin contact None known. Ire: Likely to be practically non-toxic based on animal data. No hazard in

Ingestion:	Estimated to be > 5.0 g/kg. No hazard in normal industrial use.
Delayed and chronic effects from long te	rm exposure:
Carcinogenicity:	Not expected to cause cancer. This product meets the IP-346 criteria of <3% PAH's and is not considered a carcinogen by the International Agency for Research on Cancer.
Reproductive and Developmental Toxicity:	Not known or reported to cause reproductive or developmental toxicity.
Mutagenicity:	No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.
Skin Absorption:	Upon prolonged or repeated exposure, no hazard in normal industrial use.
STOT-single exposure:	Based on available data, the classification criteria are not met.
STOT-repeated exposure:	Based on available data, the classification criteria are not met.
Aspiration hazard:	Based on available data, the classification criteria are not met.

Numerical measures of toxicity, including ATEs Based on available data, the classification criteria are not met.

12	Ecol	logical	information	
	200	ogioui	minoritiation	

Ecotoxicity (aquatic and terrestrial, if	
available):	

Slight ecological hazard. In high concentrations, this product may be dangerous to plants and/or wildlife.

#### **Ecological Toxicity Data:**

Chemical Name	CAS registry number and any unique identifiers	Aquatic EC50 Crustacea	Aquatic ERC50 Algae	Aquatic LC50 Fish
2,6-Di-tert-butylphenol	128-39-2	EC50 (48h) Daphnia magna 0.45 mg/L	No data available	No data available
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	EC50 (48h) Daphnia magna > 1000 mg/L	No data available	LC50 (96h) Rainbow Trout > 5000 mg/L

# Persistence and degradability:Biodegrades slowly.Bioaccumulative potential:Bioconcentration may occur.Mobility in soil:This material is expected to have essentially no mobility in soil. It absorbs strongly to most soil types.Other adverse effects:None known.

#### 13 Disposal considerations

Information on safe handling for disposal and methods of disposal, including any contaminated packaging: Spent or discarded material is non-hazardous according to environmental regulations.

#### 14 Transport information

Transportation of Dangerous Goods by lar	nd (TDG):
UN number: UN Proper shipping name:	Not regulated for road transport Not applicable
Transport hazard class(es):	Not applicable
Packing group:	Not applicable
International carriage of dangerous goods	by sea (IMDG/IMO):
UN number:	Not regulated by IMDG
UN Proper shipping name:	Not applicable
Transport hazard class(es):	Not applicable
Packing group:	Not applicable
International carriage of dangerous goods	by air (IATA):
UN number:	Not regulated by IATA
UN Proper shipping name:	Not applicable
Transport hazard class(es):	Not applicable
Packing group:	Not applicable
Environmental hazards according to the International Maritime Dangerous Goods Code and the United Nations Model Regulations:	No
Transport in bulk (according to Annex II of the International Convention for the Prevention of Pollution From Ships, 1973, as modified by the Protocol of 1978 (MARPOL 73/78) and the International Code for the Construction and Equipment of Ships carrying Dangerous Chemicals in Bulk (IBC Code)):	No data available
Special precautions in connection with transport or conveyance either within or outside the premises:	No data available

### 15 Regulatory information

Safety, health and environmental regulations, made within or outside Canada, specific to the product in question: Canada - Domestic Substances List (DSL):

Chemical Name	CAS No	Canada - Domestic Substances List (DSL)
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	Yes

#### Canada - Non-Domestic Substances List (NDSL):

Chemical Name	CAS No	Canada - Non-Domestic Substances List (NDSL)
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No

#### Canada - Controlled Drugs and Substances:

Chemical Name	CAS No	Schedule I	Schedule II	Schedule III	Schedule IV	Schedule V	Schedule VII	Schedule VIII
Petroleum distillates,								
hydrotreated heavy	64742-54-7	No	No	No	No	No	No	No
paraffinic								

Chemical Name	CAS No	Class A Precursors	Class B Precursors	Exempt Precursors	Class 1 Targeted Substances	Class 2 Targeted Substances
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No	No	No	No	No

#### Canada - CEPA - Schedule III Export Control List:

Chemical Name	CAS No	Part 1 Prohibited Substances	Part 2 Substances Subject to Notification or Consent	Part 3 Restricted Substances	Export Control List
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No	No	No	No

#### Canada CEPA - 2015 Greenhouse Gases (GHG) Subject to Mandatory Reporting:

Chemical Name	CAS No	Canada CEPA - 2015 Greenhouse Gases (GHG) Subject to Mandatory Reporting
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No

Canada - Narcotic Control Regulations (C.R.C., c. 1041):

Material name: KLONDIKE AW 22 Advanced Formula Hydraulic Fluid Version #: 01 Issue date: 08-06-2021

Chemical Name	CAS No	Canada - Narcotic Control Regulations (C.R.C., c. 1041)
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No

#### Canada - Ontario - Toxics Reduction - List of Priority Toxics:

Chemical Name	CAS No	Canada - Ontario - Toxics Reduction - List of Priority Toxics
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No

#### Stockholm Convention on Persistent Organic Pollutants:

Chemical Name	CAS No	Stockholm Convention on Persistent Organic Pollutants
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No

# Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade:

Chemical Name	CAS No	Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No

#### (United Nations) - Kyoto Protocol - Convention on Climate Change - Greenhouse Gases (GHGs):

Chemical Name	CAS No	(United Nations) - Kyoto Protocol - Convention on Climate Change - Greenhouse Gases (GHGs)
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No

#### Montreal Protocol on Substances that Deplete the Ozone Layer:

Chemical Name	CAS No	Montreal Protocol on Substances that Deplete the Ozone Layer
Petroleum distillates, hydrotreated	64742-54-7	No
heavy paraffinic		

Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal:

Chemical Name	CAS No	Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal
Petroleum distillates, hydrotreated heavy paraffinic	64742-54-7	No
