

KLONDIKE Moly Tac Bentone High Temp EP-2

PRODUCT DESCRIPTION

KLONDIKE Moly Tac Bentone High Temp EP-2 Grease is formulated from a special blend of highly refined, high viscosity base oil thickened with bentonite clay. This bentonite clay based grease is recommended for extremely high temperature applications. Unlike some other grease types, Wide Temperature Moly Bentone Grease will retain its consistency when exposed to very high temperatures.

APPLICATIONS

Recommended for use in kiln car wheel bearings, furnace door bearings, heat exchange motor bearings, oven conveyors and other application where extremely high temperatures are encountered.

FEATURES AND BENEFITS

KLONDIKE Moly Tac Bentone High Temp EP-2 Grease provides value through the following benefits:

- **Very high temperature protection**
- **Excellent resistance to water, vibration, and high loads**
- **Oxidation inhibited for long life in service**
- **Highly resistance to change in consistency with temperatures**
- **Added moly content for outstanding adhesion to metal surfaces and bearings**

KLONDIKE Moly Tac Bentone High Temp EP-2

TYPICAL TECHNICAL PROPERTIES

PROPERTY	NLGI 2
Penetration @ 25°C	270 – 290
Dropping Point, ASTM, °C	None
Thickener Type	Organically modified clay
Solid Lubricant	Molybdenum Disulphide
Colour	Charcoal
Appearance	Buttery
Base oil viscosity, cSt @ 40°C	14 cSt

All stated physical properties are typical of standard production and may vary.

HEALTH AND SAFETY

This product is not expected to have adverse health implications when used for its intended application. For detailed information on safe handling of this product, refer to its Material Safety Data Sheet (MSDS). To obtain an MSDS on this or any other KLONDIKE product, please visit www.klondikelubricants.com or call 1-877-293-4691. When disposing of used product, be responsible to the environment.
