KLONDIKE TDTO-4 Transmission / Drive Train Oils: SAE 10W, 30, 50

PRODUCT DESCRIPTION

KLONDIKE TDTO-4 Transmission / Drive Train Oils are specialized, advanced fluids designed for the needs of heavy duty equipment systems in mobile and stationary equipment where Caterpillar TO-4 or Allison C-4 fluids are specified. These fluids provide excellent operating and maintenance benefits across a broad temperature range for increased efficiency, performance, and component protection.

APPLICATIONS

KLONDIKE TDTO-4 Transmission / Drive Train Oils are recommended for use in Caterpillar and other competitive brands of heavy duty off-road equipment in applications where fluids meeting TO-4 requirements are specified. Typical applications include, but are not limited to, powershift and hydrostatic transmissions, torque converters, wet brake mechanisms, differentials, final drives, and hydraulic systems. Other applications include manual transmissions where API GL-3 or Allison C-4 fluids are specified.

FEATURES AND BENEFITS

KLONDIKE TDTO-4 Transmission and Drivetrain fluids are blended with premium paraffinic base stock and high performance additives for long term, trouble free service in high-torque, high-output applications operating under heavy loads and severe stress.

KLONDIKE TDTO-4 Transmission and Drivetrain fluids deliver outstanding friction retention and anti-wear protection, minimizing clutch slippage for complete power transfer. Advanced formulation maximizes the life of clutch materials, eliminates wet brake chatter, protects components against wear, prevents friction surface glazing, and resists high temperature oxidation.

KLONDIKE TDTO-4 Transmission and Drivetrain fluids deliver value through the following benefits:

- Friction material compatibility full fluoroelastomer compatibility ensures maximum friction disc life and delivers consistent, reliable performance.
- **High oxidation stability** resists heat induced oil thickening and deposit formation in high pressure, high temperature service applications
- Outstanding anti-wear premium anti-wear additives minimize metal to metal contact even in high pressure operation
- Increased efficiency the right fluid maximizes equipment reliability and minimizes maintenance costs.
